

AdvEOTec's strength relies on the experience of its multidisciplinary team. The mastering of different expertises and technological building blocks are the many assets acquired throughout its extensive achievements for applied research, product development and industrial

Our unique know-how

- Optics
- Software
- Thermal management
- Vacuum technique
- Physical measurements
- Micro mechanics
- RF/Microwaves
- Digital electronics
- Analogue electronics

A partnership approach. AdvEOTec ...

► TEST HOUSE

Defines and implements a wide range of tests and measurements thanks to its modern laboratories and highly qualified team.

► TECHNOLOGICAL CONSULTING

Assists you in choosing the right technologies, elaborating specifications, selecting suppliers, preparing qualification test programmes ...

► MULTIDISCIPLINARY TEAM

Associates various technologies (optics, electronics, RF/Microwaves...) thanks to technical know-how in applied research and product development to reach high-performance solutions and gain competitive advantages.

► CUSTOMISED TRAINING

Collaborates with your teams, engineers and technicians, so that new technologies are used in the best conditions. AdvEOTec is declared training institution.

► INDUSTRIAL MAINTENANCE

Renews, rebuilds, repairs your high-tech measurement systems. Offers maintenance and calibration contracts, and redesigns obsolete solutions.

► INNOVATIVE SOLUTIONS

Creates and industrialises systems for severe environments. Implements automated test and measurement systems.

► REGULATIONS AND SAFETY

Elaborates optoelectronic solutions taking into account norms and regulations, optical radiation safety, means of protection and preventive actions.

► PROJECT MANAGEMENT

Implements project management best practices to optimise quality, cost and delivery time.

AdvEOTec is specialised in the measurement of optoelectronics and in optoelectronics for measurements. Its activities are mainly oriented to demanding environments. For many years,

AdvEOTec has been providing advanced systems and services to various industrial sectors such as telecommunications, defence, space, aeronautics, energy, biotechnologies and transportation.

Advanced Electro-Optic Technologies

Specialists and experts in :

- Optoelectronics***
- Measurements***
- Tests and qualification***

AdvEOTec develops innovative, industrial and reliable solutions for measurements and measurement equipment.

AdvEOTec provides "Test House" services to : assess technologies, validate processes, evaluate performances, qualify products...
